 ٢٠١١/٣/٣٠ - ٣٠ - ٣٠ (الروى المسئلة للتمية المستدامة في التعليم العلمى) الموسوم بـ

The Aim of the Research:
 This study aims at:
 1-Finding out whether there's any correlation between SD and English language Learning
 2-Determining whether the availability of SD can help improve English Language Learning.

Limitation of the Research:
 Sustainable development is generally thought to have three components: environment, society and economy. Although these three components are interrelated, only social sustainable development is dealt with focusing on Education for sustainable development which in turn sheds light on sustaining English Language Learning.

schools syllabus , enhancing the new syllabus with CDs to develop students' listening comprehension and holding training courses for school teachers to equip them with the new techniques of teaching English as a foreign language.
